

Slow Juicer for Fruits and Vegetables

This slow juicer efficiently extracts juice from both hard and soft fruits and vegetables, including leafy greens. Its low-speed motor minimizes heat and oxidation to preserve nutrients and enzymes.

Product Overview

Efficient Nutrient-Rich Juicing

This professional-grade slow juicer is specifically engineered to maximize juice extraction from a wide variety of fruits and vegetables. By utilizing a low-speed motor, the machine significantly minimizes heat buildup and oxidation during the juicing process to help preserve vital enzymes and nutrients. Its user-friendly design features a continuous feeding chute and dedicated containers for both pulp and juice, making it an ideal solution for efficient, high-quality production.

Technical Specifications

Maintenance & Cleaning

- Easy assembly and disassembly
- Dishwasher-safe components
- Integrated pulp collection container

Juicing Technology

Low-speed motor for cold-press extraction

Design & Utility

Key Features

Compact footprint, Continuous juicing, Nutrient preservation
