

Slow Juicer for Fruits and Vegetables

This juicer extracts juice from both hard and soft fruits and vegetables. It can also process leafy greens such as kale and spinach.

Product Overview

Professional Grade Extraction

This slow juicer is engineered for high-efficiency extraction of fruits and vegetables, ensuring maximum nutrient retention. By utilizing a low-speed motor, it effectively minimizes heat buildup and oxidation, providing a superior juice quality compared to traditional blenders. The unit features a robust design with intuitive controls for professional operational reliability.
