

Slow Masticating Juicer for Fruits and Vegetables

This slow juicer extracts juice from a variety of fruits and vegetables, including leafy greens. It utilizes a low-speed motor to reduce heat and oxidation, which helps preserve nutrients.

Product Overview

Professional Juice Extraction

This slow masticating juicer is engineered for maximum nutrient retention through a low-speed motor that minimizes heat and oxidation. Designed for efficiency, the unit effectively separates juice from pulp to ensure a high-quality yield. Its compact footprint makes it a versatile addition to any professional kitchen or commercial workspace.

Technical Specifications

Motor Speed Type	Low-speed
Operating Modes	Start, Stop, Reverse, Off

Features

Included Components

- Main juicing unit
- Juice collection container
- Pulp collection container

Key Benefits

Nutrient preservation • Efficient separation • Compact design • Easy operation
