

Slurry Pump Frame Plate

The slurry pump frame plate is manufactured from durable materials. It is designed to withstand abrasive and corrosive environments, providing reliable support for the pump's internal components.

Product Overview

Robust Slurry Pump Component

The slurry pump frame plate is engineered for high-performance operation in demanding industrial slurry handling environments. Constructed from premium alloys and specialized rubbers, this component ensures long service life and reduced maintenance downtime through superior abrasion and corrosion resistance. Precision-machined for exact alignment, it provides reliable structural support for critical internal pump components.

Material Specifications

Available Materials

High Chrome Alloy (A05), High Chrome Alloy (A07), High Chrome Alloy (A49), Natural Rubber (R08), Natural Rubber (R26), Natural Rubber (R33), Natural Rubber (R55)

Compatibility & Service

Compatible Pump Components

- Impeller (Open/Closed)
- Throat Bush
- Front/Back Liner
- Volute
- Expeller
- Shaft and Shaft Sleeve
- Bearing Assembly

Customization

Yes
