

Slurry Pump Replacement Parts

These replacement parts are compatible with Warman slurry pumps. They are made from hard alloy metal or rubber, offering abrasion and corrosion resistance.

Product Overview

Industrial Slurry Pump Replacement Parts

These high-performance replacement parts are designed for reliability and longevity in demanding industrial slurry pumping applications. Manufactured from premium wear-resistant materials, our range includes critical components such as impellers, liners, and shaft assemblies engineered to withstand extreme abrasive environments. We offer extensive material flexibility and professional OEM services to meet your specific operational requirements.

Material Composition

Material Options

High Chrome Alloy A05, High Chrome Alloy A07, High Chrome Alloy A49, Natural Rubber R08, Natural Rubber R26, Natural Rubber R33, Natural Rubber R55

Part Range

Available Spare Parts

- Impellers (Open & Closed)
- Liners (Front, Back, Volute, Frame Plate, Cover Plate)
- Shaft & Shaft Sleeve
- Throat Bush & Neck Ring
- Bearing Assembly & Cartridge
- Expeller & Expeller Ring
- Casings & Covers
