

Small Engine for Machinery

This small engine is suitable for use in lawnmowers, generators, and other small machinery. It features cooling fins, a carburetor, and an oil fill cap.

Product Overview

Compact Power Solution

This small engine is engineered for versatility and reliability in various machinery applications, including lawnmowers and portable generators. Its robust construction features efficient cooling fins and accessible maintenance points, such as the oil fill cap, ensuring ease of use for operators. Designed for durability, this unit provides consistent performance for demanding small-scale mechanical tasks.

Technical Specifications

Key Components

- Cooling fins for thermal management
- Integrated carburetor system
- Accessible oil fill cap
- Heavy-duty housing

Suitable Applications

Lawnmowers, Generators, Small Machinery
