

Small-Scale Oil Refining Equipment

This small-scale oil refining equipment is designed for processing various types of oils. It integrates multiple refining stages, including degumming, neutralization, bleaching, and deodorization, to ensure high-quality refined oil output.

Product Overview

Compact Refining Solution

The YLYX-b model is a small-scale, complete refining oil equipment designed for professional processing of various oil types. This self-contained unit integrates essential refining stages including degumming, neutralization, bleaching, and deodorization to ensure high-quality output. Its automated controls and space-saving design make it an ideal, cost-effective solution for small to medium-sized processing facilities.

Technical Specifications

Process Metrics

4 t/d

Capacity

11.2 kW

Total Power

Overall Dimensions

12.3 x 11.5 x 4.5 meters

Features

System Capabilities

Degumming, Neutralization, Bleaching, Deodorization, Automated Controls
