Overview

Smart Health Monitoring

This Smart Digital Body Composition Scale offers a comprehensive health monitoring solution for modern households. Utilizing high-precision sensors and TUYA WiFi connectivity, it seamlessly syncs detailed body metrics directly to the Smart Life app without needing to open the app during every weigh-in. The durable 6mm tempered glass design combined with advanced body composition analysis makes it an essential tool for tracking fitness goals and family health.

Key Performance Metrics

Performance Highlights

180 kg

Max Capacity

0.1 kg

Division Value

4

Precision Sensors

Body Composition Analysis

Measured Parameters

Weight, BMI, Body Fat, Water Content, Muscle Mass, Visceral Fat, Protein, Bone Mass, BMR, Physical Age, Defatted Body Weight

Connectivity & App

Comprehensive smart features including TUYA WiFi connectivity, high-precision sensors, and detailed body metric tracking via the Smart Life app.

Smart Features

- TUYA WiFi solution for seamless data sync
- Automatic data transfer to Smart Life App
- Multi-user support for family health monitoring
- Remote monitoring capabilities
- Personalized diet and exercise plan integration

Physical Design

Design Details

Rounded Corners • Step-on Activation • Auto-off • Overload Indication • Low Battery Indication

Platform Material	6mm High-strength tempered glass with ITO coating
Product Dimensions	300mm x 300mm x 21mm
Display	LED display with white digital readouts

Technical Specifications

Power Source	3 x AAA batteries (included)
Supported Units	KG, LB, ST:LB
Weighing Range	5kg - 180kg
Net Weight	1.6 kg
