Product Overview

Advanced Body Composition Intelligence

This professional-grade smart scale leverages advanced ITO technology and high-precision sensors to deliver comprehensive body composition analysis. Designed for seamless integration into modern health routines, it offers WiFi connectivity for automatic data syncing with the Tuya Smart Life ecosystem. With its elegant tempered glass platform and high-visibility LED display, it provides a sophisticated, reliable tool for family-wide health tracking and personalized wellness management.

Technical Specifications

High-precision sensing technology and WiFi data synchronization overview.

Dimensions & Build

300 mm

Platform Width

300 mm

Platform Depth

21 mm

Thickness

6 mm

Glass Thickness

System Indicators

- Overload indication
- Low battery warning
- Step-on automatic activation
- Automatic power-off

Sensor Technology

4 Precision Strain Gauge Sensors, ITO Conductive Coating

Power Requirements

3 x AAA batteries (included)

Smart Features

Smart Life App Features

- Multi-user family management
- Automatic data synchronization
- Remote health monitoring
- Real-time weight and body composition tracking

Connectivity

WiFi, Tuya Smart Home Integration
