

Smart Posture Correction Belt with Vibration Reminder

This posture correction belt offers three-dimensional posture monitoring. It features a vibration reminder that alerts the wearer to incorrect posture.

Product Overview

The MQ03 posture correction device features a compact, invisible design for daily wear.

Invisible Intelligent Correction

The MQ03 is a sophisticated posture correction device engineered to provide three-dimensional monitoring of your spinal alignment. Designed for discreet wear, it utilizes an active vibration reminder system to alert users immediately when slouching or bending occurs. This device is an effective tool for preventing common posture issues such as uneven shoulder height and side bending, helping you maintain a healthy, upright position throughout the day.
