Product Overview

Advanced Oral Hygiene Solution

This smart rechargeable water flosser is engineered to provide deep cleaning between teeth and below the gum line, effectively removing plaque and bacteria where traditional brushing fails. Designed for versatility, it supports dental bridges, braces, and crowns while promoting improved gum circulation. With an ergonomic design, 360-degree rotating nozzle, and a portable waterproof construction, it offers a seamless and professional-grade oral care experience.

Technical Specifications

Performance Metrics

90 PSI

Max Water Pressure

1400 pulses/min

Pulse Frequency

150 ml

Tank Capacity

Waterproof Rating

IPX7

Operation Modes

Normal, Soft, Pulse

Noise Level

75 dB

Power and Charging

Power & Efficiency

Feature	Value
Battery Capacity	1400mAh
Charging Method	Inductive
Input Voltage	100-240V
Run Time	60 minutes

Design and Compatibility

Materials

- ABS Plastic
- Polycarbonate (Tank)

Product Dimensions

110L x 99W x 294H mm
