

SMT 12mm Tape Feeder for SM482

This SMT tape feeder is designed for use with SM482 surface mount machines. It ensures precise component placement during the surface mount assembly process.

ADDITIONAL IMAGES

Product Overview

Precision component delivery for SMT assembly lines.

Professional SMT Component Feeder

This high-precision 12mm tape feeder is engineered specifically for use with industrial surface mount technology assembly machines. It facilitates accurate and reliable component delivery, which is essential for maintaining high-speed production line efficiency. Built for durability and consistent performance, this unit is a critical component for high-volume automated electronic assembly environments.

Technical Specifications

Engineered for high-speed automated electronic assembly.

Tape Width	12 mm
Country of Origin	Korea

Compatibility

Compatible Machine Series	SM482, SM481, SM471, SM421, SM321, SM320, CP60, CP45, CP40
---------------------------	--

Operating Safety

Handling Requirements

- Do not disassemble
- Ensure secure installation
- Maintain for optimal pick-and-place performance
