

SMT Belt Conveyor for Yamaha Equipment

This belt conveyor is designed for use in Yamaha SMT (Surface Mount Technology) equipment. It ensures smooth and reliable material handling in automated assembly lines.

Product Overview

High-Precision Belt Conveyor

This original, newly manufactured belt conveyor is designed specifically for automated SMT (Surface Mount Technology) equipment. Engineered to facilitate smooth and reliable material handling, it helps maintain optimal production efficiency and minimizes operational downtime. Each component is produced to stringent quality standards to ensure long-term durability and performance in demanding assembly line environments.

Technical Details

Condition

Original • New

Part Number

KV7-M9129-00X

Country of Manufacture

Japan

Compatibility

Compatible Equipment Series

- YV100X
- YV100XG
- YG200
- 88X/88XG
