

SMT Pick and Place Machine Nozzle 110

This high-precision nozzle is designed for Panasonic CM402 and CM602 series SMT pick and place machines. It is engineered for accurate and reliable component handling during PCB assembly.

Product Overview

Precision Component Handling

This high-precision nozzle is engineered specifically for use with advanced SMT pick and place machinery. It is designed to ensure accurate and reliable component handling during the PCB assembly process. With its robust construction, this component offers extended operational life and consistent performance for demanding manufacturing environments.

Compatibility

Compatible Series	CM402, CM602
-------------------	--------------

Specifications

Handling Capability

High-Precision • PCB Assembly

Nozzle Type	110
Primary Application	SMT Pick and Place
