

SMT Pick and Place Machine Nozzle

This pick and place machine nozzle ensures reliable component handling during automated assembly processes. It features a spring-loaded mechanism for controlled placement and robust construction for extended operational life.

Product Overview

Precision SMT Nozzle Assembly

This high-precision SMT nozzle is engineered for reliable component handling during automated assembly processes. Featuring a spring-loaded mechanism for controlled placement and a robust construction for extended operational life, it ensures accurate pickup and placement of electronic components. Designed to maintain optimal performance and reduce downtime, this component is essential for automated pick-and-place equipment.

Technical Specifications

100 & 200 Series Nozzles

Series	Part Number	Nozzle ID
100	E35037210A0	103
100	E35047210A0	104
100	E35057210A0	105
100	E35067210A0	106
200	E3571721000	201
200	E3572721000	202
200	E3573721000	203
200	E3574721000	204

500 Series Nozzles

40001339 (501), 40001340 (502), 40001341 (503), 40001342 (504), 40001343 (505), 40001344 (506), 40001345 (507), 40001799 (508), 40025165 (509), E36157290A0 (510), E36167290A0 (511), 40011046 (500), 40010999 (500), 40010995 (502), 40010996 (503), 40010997 (504), 40010998 (505)
