

SMT Pick and Place Nozzle

This precision-engineered nozzle is designed for automated surface mount technology (SMT) placement equipment. Its robust construction and optimized internal geometry ensure reliable component handling and consistent vacuum performance during high-speed pick-and-place operations.

Product Overview

High-Precision SMT Nozzles

These precision-engineered nozzles are designed for automated surface mount technology (SMT) placement equipment. Built for reliable and accurate component handling during high-speed pick-and-place operations, they feature robust construction and optimized internal geometry to ensure consistent vacuum performance. These components are essential for maintaining optimal SMT line efficiency and minimizing component damage across a wide range of sizes and types.
