

SMT Pick and Place Nozzles

These precision-engineered SMT nozzles are designed for YAMAHA pick-and-place machines. They are critical components for accurate and reliable component placement in surface mount technology assembly processes.

Product Overview

Precision SMT Pick and Place Nozzles

These precision-engineered nozzles are designed for YV100X series pick and place machinery, offering reliable component placement for surface mount assembly. Available in a variety of diamond-tipped configurations, these nozzles ensure high accuracy for diverse component types and sizes. They are essential components for maintaining consistent throughput and quality in electronic manufacturing environments.

Nozzle Specifications

Available Nozzle Configurations

Part Number	Type	Feature
KV8-M71N1-A00D	71F	Diamond Tip
KV8-M71N2-A00D	72F	Diamond Tip
KV8-M71N3-A00	73F	Standard
KV8-M7700-A0XD	7XA	Diamond Tip
KV8-M7760-00X	76A	MELF
