

SMT Placement Machine Conveyor Belt for Yamaha YG12 YS12 YS24

This SMT conveyor belt is designed for Yamaha YG12, YS12, and YS24 placement machines. It facilitates the transfer of components during the SMT assembly process.

Product Overview

High-Precision SMT Conveyor Belts

These replacement conveyor belts are designed for optimal performance in Yamaha series pick-and-place machines. Engineered for reliable component transfer, they help maintain machine precision and reduce operational downtime during the assembly process. Available in various specifications to suit YG12, YS12, YS24, and YV100 series equipment.
