

SMT Placement Nozzle JUKI 515

This SMT placement nozzle is designed for use with JUKI pick-and-place machines. It is essential for accurate and reliable component placement during electronic assembly.

Product Overview

Precision SMT Placement Nozzle

The 515 nozzle assembly is a precision-engineered component essential for reliable surface mount technology pick-and-place operations. Designed for high-speed and high-precision electronic assembly, this unit features a robust metallic body for durability. Its integrated spring-loaded mechanism and specialized tip ensure secure component gripping during complex production cycles.

Technical Specifications

Compatible Assemblies

Nozzle Type	Part Number
515	E36207290A0
510	E36157290A0
511	E36167290A0
512	E36177290A0
513	E36187290A0
514	E36197290A0
