

SMT Yamaha FNC Nozzle Bevel Gear

Precision-engineered bevel gear designed for SMT Yamaha FNC nozzles. This component ensures reliable and accurate performance in surface mount technology applications.

Product Overview

Precision Component for SMT Assembly

This high-precision bevel gear is engineered specifically for SMT nozzle systems, ensuring reliable and accurate performance during surface mount assembly operations. It is a brand new, original component designed to meet exacting technical standards. By maintaining optimal gear function, this part directly contributes to the operational efficiency and longevity of high-speed SMT placement machinery.

Identification

Condition

New • Original

Part Number

KV8-M71RB-A0X

Compatibility

Associated Sensor Components

- KM9-M7158-00X
- KM9-M7165-00X
- KM9-M7159-00X
- KM8-M7160-00X
- KM0-M655A-00X
- KM0-M655E-00X

Compatible Machinery

YV100II, 100XG, YG200, YVPXG

Technical Specifications

Solenoid Valve Compatibility

Part Code	Reference
KM1-M7163-20X	A010E1-37W
KM1-M7163-21X	A010E1-54W
KM1-M7163-30X	A010E1-44W
KGA-M7111-H0X	A041E1-48W
KM5-M7174-11X	AME05-E2-PSL-13W
