

# Snow Removal Shovel with Metal Blade

This snow shovel is designed for efficient snow removal. The shovel features a wide, polished metal blade with strategically placed ridges for added strength and to aid in scooping and lifting snow.

## Product Overview

### Professional Snow Removal Solution

This snow removal shovel is engineered for high-efficiency clearing of snow from driveways, walkways, and other outdoor surfaces. Featuring a wide, polished metal blade, the tool is designed to provide durability and optimal leverage during heavy snow accumulation. Strategically placed ridges on the blade enhance structural integrity, ensuring reliable performance in harsh winter conditions.

## Technical Specifications

Blade Material	Polished metal
Design Features	Reinforced ridges, Wide blade, Ergonomic leverage

## Application

### Suitable Surfaces

- Driveways
- Walkways
- General exterior areas
