

Sod Cutter Replacement Blades

High-performance sod cutter blades are engineered for efficient and precise grass removal. These blades are designed for durability and compatibility with various sod cutting machines, ensuring optimal cutting performance.

Product Overview

Professional Sod Cutter Blades

These high-performance replacement blades are engineered for efficient and precise grass root removal, promoting healthier turf growth. Constructed from durable 65Mn steel, they provide excellent longevity and consistent cutting performance across various soil conditions. Designed for versatility, these blades ensure clean cuts while minimizing turf damage, making them an essential component for professional lawn care maintenance.

Technical Specifications

Material	65Mn Steel
Blade Types Available	Sod Cutter Blade, Brush Cutter Blade, Lawn Mower Blade

Compatibility

Compatible Machinery

- Sod cutting machines
- Brush cutters
- Lawn mowers
