

Soil and Asphalt Plate Compactor

This plate compactor is a robust and efficient machine designed for soil and asphalt compaction. Ideal for construction, landscaping, and road maintenance projects, it provides reliable performance and ensures optimal compaction results.

Overview

High-Performance Compaction

This robust plate compactor is engineered for professional soil and asphalt compaction tasks. Featuring a durable steel base plate and a powerful gasoline engine, it delivers reliable performance across construction, landscaping, and road maintenance projects. The design prioritizes ease of maneuverability and long-term durability, making it an essential asset for efficient site preparation.

Technical Specifications

Construction Features

- Durable steel base plate
- Powerful gasoline engine
- User-friendly handle design
- Engineered for low maintenance

Suitable Applications

Soil Compaction, Asphalt Preparation, Construction Sites, Landscaping, Road Maintenance
