Product Overview

Professional Soil Compaction Solution

This high-performance soil compaction plate is engineered for efficient operation in confined spaces, making it an essential tool for narrow trenches, curbs, and drainage ditches. It features a robust design with a built-in water tank and heavy-duty shock mounts to minimize vibration during operation. With a foldable handle and integrated wheels, this equipment offers superior portability and ease of storage for demanding construction environments.

Technical Specifications

Engine Displacement	212 cc
Engine Power	7 HP

Key Features

Operational Features

- Integrated water tank for dust control
- Foldable handle for compact storage
- Built-in wheels for easy maneuverability
- Throttle control for adjustable working speed
- Sealed belt cover to protect against debris

Vibration Dampening	Yes
---------------------	-----

Applications

Suitable Applications	Narrow Trenches, Curbs and Gutters, Drainage Ditches, Foundation Preparation, Asphalt Repair, Interlocking Pavers
-----------------------	---

Certifications

Compliance

CE Certified • EPA Compliant • ISO 9001
