

Soil Compaction Plate

This plate compactor is designed for efficient soil compaction in various construction and landscaping applications. Ideal for compacting granular soils, asphalt, and other materials, this machine ensures a solid and level surface for paving, foundations, and other projects.

Overview

Professional Soil Compaction

This plate compactor is engineered for high-efficiency soil compaction in diverse construction and landscaping environments. Built with a robust engine and a durable steel base plate, it delivers reliable performance for compacting granular soils, asphalt, and other ground materials. The user-friendly design ensures comfortable operation, making it an ideal solution for preparing solid, level surfaces for foundations and paving projects.

Technical Specifications

Key Features

- Robust engine performance
- Durable steel base plate
- Ergonomic user-friendly handle
- High-efficiency compaction

Model Identifier	CP73
Suitable Applications	Granular Soil, Asphalt, Landscaping, Construction, Foundation Preparation
