Product Overview

Sustainable Outdoor Lighting

This high-efficiency solar LED street light provides a sustainable and cost-effective lighting solution for streets, parking lots, and outdoor pathways. Designed with a durable die-cast aluminum body and tempered glass, it ensures reliable performance and longevity in various environmental conditions. By harnessing solar energy, it minimizes operational costs while maintaining bright, high-quality illumination throughout the night.

Technical Specifications

Available Wattage

- 30W
- 50W
- 100W
- 150W
- 200W

Beam Angle

120 °

Construction & Materials

Thermal Management

Excellent heat sink

Housing Material

Die-cast aluminium

Optical Features

Nano reflector, 2835 SMD LED, Tempered glass
