Overview

Unique V-shape design provides a modern aesthetic with dual-direction butterfly lighting.

Modern Butterfly Solar Wall Light

This innovative solar wall light features a unique V-shaped design that provides simultaneous front and back illumination, creating a beautiful butterfly-like lighting effect. Designed for modern outdoor spaces, it operates entirely on solar energy, ensuring zero electricity costs and a sustainable footprint. The unit is equipped with a smart PIR motion sensor and weather-resistant construction, making it an ideal, maintenance-free solution for gardens, pathways, and entrances.

Technical Specifications

Power & Brightness

1.5 W

Power

220 LM

Luminous Flux

Color Temperature

- Front: 6000K
- Back: 3000K

LED Configuration

SMD2835 (10pcs total)

Power & Battery

Battery Details

Li-ion 18650, 1200mAh / 3.7V (Replaceable)

Solar Panel Type

Mono-crystalline

Charging Time

8 hours

Lighting Duration

4-5 nights on full charge

Sensors & Controls

Smart PIR sensor modes: Automatically switches between full and dim brightness based on motion detection.

PIR Detection

120° / 2-6 Meters

Operational Modes

Sensor + Dim adjustable, Auto on/off

Durability & Installation

Simple installation process: Drill, plug, and mount for a secure, wire-free setup.

Ingress Protection

IP65 Waterproof

Installation

No wiring required, Wall mount, Easy install

Warranty

2 years (Battery: 1 year)
