

Solar Power Generation System 15 MWp

This solar power system has a capacity of 15 MWp. It was completed in August 2008.

System Overview

Solar Energy Solution

This 15 MWp solar power generation system located in Mahora, Albacete, Spain, represents a high-capacity renewable energy installation. Completed in August 2008, the facility utilizes proven module technology designed for consistent energy conversion. The project highlights reliable long-term performance for large-scale solar power needs.

System Size

15 MWp
Capacity

Technical Details

Module Type	CS6P-P
