Product Overview

Eco-Friendly Solar Washing Technology

This innovative washing machine leverages solar power to provide an electricity-free cleaning solution, significantly reducing operational costs. Utilizing advanced ozone technology, it disinfects and deodorizes fabrics without the need for chemical detergents, offering a sustainable alternative for both domestic and commercial environments. The machine ensures thorough sanitation and efficiency, making it highly effective for diverse laundry needs.

Technical Specifications

Automatic washing machine designed for efficient and thorough cleaning.

Durable SUS 304 stainless steel construction suitable for heavy-duty industrial environments.

Suitable Applications

- Domestic use
- Industrial/Commercial use
- Hospitals
- Hotels

Capacity

12 kg

Material Grade

SUS 304 Stainless Steel

Key Features

Core Technologies

Ozone Sanitization • Solar-Powered Operation • Detergent-Free Cleaning • Energy Saving

System Requirements

A complete solar-powered laundry solution including MPPT controller and pure sine wave inverter.

Solar System Components

| Component | Function |
|-------------------------|---|
| Solar Panels | Convert sunlight to electrical energy |
| MPPT Controller | Optimizes charging and battery protection |
| Battery Bank | Safe energy storage |
| Pure Sine Wave Inverter | Converts DC to AC for appliance usage |
