

Solar Powered Dome Light

This solar-powered lighting system features a dome-shaped light fixture connected to a photovoltaic panel. It is designed for outdoor use, providing illumination by converting solar energy.

Product Overview

Sustainable Outdoor Illumination

This solar-powered dome light provides an efficient and sustainable lighting solution for outdoor environments. Featuring a robust, dome-shaped fixture with a clear, translucent cover, it is engineered to deliver reliable illumination using renewable solar energy. The integrated photovoltaic panel ensures consistent charging, making it an ideal choice for off-grid or energy-conscious installations.

Technical Specifications

Construction

- Black base
- Clear translucent dome
- Integrated rectangular photovoltaic panel
