

Solar Powered Lawn Light

This solar powered lawn light uses solar energy to power its LED. It automatically controls the light based on ambient conditions, offering stable performance and corrosion resistance.

Product Overview

Sustainable Outdoor Lighting

The XNY-TC-03 solar lawn lamp utilizes high-efficiency solar energy as a power supply, offering a sustainable and eco-friendly lighting solution. Featuring a durable, corrosion-resistant housing, this lamp is designed for reliable long-term performance in outdoor environments. It incorporates high-brightness LED technology to provide clear illumination, while its sleek design ensures aesthetic appeal for lawns and garden landscapes.
