Product Overview

Versatile Solar-Powered Illumination

This solar-powered LED camping lantern is a reliable and energy-efficient lighting solution designed for outdoor recreation and emergency preparedness. Featuring a built-in solar panel for sustainable recharging, it provides bright, uniform illumination with multiple lighting modes including high, low, and strobe. Its durable PC construction and integrated hanging hook make it an ideal choice for camping, hiking, and backup lighting during power outages.

Technical Specifications

Input Voltage	5V 1A
Material	PC (Polycarbonate)

Model Comparison

Model Specifications

Model	Power	Lumen	Battery	Size
F80	20W	1600lm	1200mAh	Ø80*116.5mm
F95	30W	2400lm	2400mAh	Ø95*144mm
F105	40W	3200lm	3600mAh	Ø105*162mm
F120	50W	4000lm	3600mAh	Ø120*184.5mm
F120-High	50W	4000lm	4800mAh	Ø120*184.5mm

Features

Key Features

- Integrated solar panel for autonomous charging
- Durable construction for various weather conditions
- Portable design with hanging hook
- Energy-efficient LED technology

Lighting Modes

High, Low, Strobe
