

Solar Powered LED Ice Brick Light

This LED solar ice brick light is designed to mimic the appearance of a real ice cube, providing a unique and decorative lighting solution. It features durable construction suitable for outdoor use and automatically illuminates at dusk.

Product Overview

Solar Powered LED Ice Brick Light

This Solar Powered LED Ice Brick Light offers a sophisticated, decorative lighting solution designed to mimic the appearance of ice. Constructed from durable ABS and ice glass, it features an IP65 rating, ensuring reliability in various outdoor environments. With its integrated polysilicon solar panel and efficient battery, it provides up to 10 hours of illumination, making it an ideal choice for enhancing gardens, patios, and walkways with a modern, ambient glow.

Technical Specifications

Light Source Power

0.06 W

LED Power

| | |
|-------------------|----------|
| Battery Capacity | 600 mAh |
| Battery Voltage | 1.2 V |
| Charging Time | 8 Hours |
| Lighting Duration | 10 Hours |

Construction & Design

Key Advantages

- Anti-aging and anti-rust properties
- Scratch-resistant construction
- Fast-charging polysilicon solar panel
- Simple and elegant aesthetic

Ingress Protection
