

Solar-Powered LED Street Address Sign

This solar-powered street address sign operates without wiring, offering zero-cost functionality. Advanced electroluminescence technology provides various color effects for clear visibility.

Product Overview

Solar-Powered LED Street Address Sign

This solar-powered electronic street address sign provides high-visibility identification for residential properties, ensuring clear visibility for emergency services, deliveries, and visitors. Designed for zero-cost operation, the unit functions without the need for external wiring. It features advanced electroluminescence technology for consistent illumination and is housed in a durable, weatherproof casing for long-term outdoor reliability.

Technical Specifications

Power Source	Solar-powered with integrated NI-Mh battery
Illumination Technology	Advanced Electroluminescence (EL)
Durability & Protection	Weatherproof, Built-in protection circuits, Durable construction

Features

Key Operational Benefits

- Zero operating costs
- Wireless installation
- Automatic day/night switching
- Environmentally friendly battery technology
