

Solar Powered LED Street Light

This solar-powered street light is designed for sustainable and energy-efficient illumination. It features a dual-panel solar array and a modern LED luminaire.

Overview

Sustainable Urban Lighting

These solar-powered street lights provide a sustainable and energy-efficient illumination solution for both urban and rural environments. Each unit features a high-performance dual-panel solar array and durable construction, ensuring reliable operation with minimal maintenance. The modern LED luminaires offer bright, long-lasting performance, making them an ideal choice for off-grid or energy-conscious infrastructure projects.

Technical Specifications

Power Source	Solar Energy
Light Source	LED
Solar Array Configuration	Dual-panel

Build Quality

Durability Features	Durable Construction, Environmental Resistance, Stable Mounting
---------------------	---

Deployment

Installation and Maintenance

- Easy installation process
- Minimal maintenance requirements

Ideal Applications

Urban Lighting • Rural Infrastructure • Public Pathways
