

# Solar Powered LED String Lights for Outdoor Decor

This solar-powered LED string light set is designed for outdoor use, providing ambient lighting for gardens and patios. The system includes four LED bulbs with decorative crystal-like covers, connected to a solar panel that efficiently converts sunlight into electricity.

## Product Overview

### Sustainable Outdoor Illumination

These solar-powered LED string lights are designed to enhance outdoor environments such as gardens and patios with warm, inviting ambient lighting. Featuring four decorative crystal-like bulb covers, the system integrates a highly efficient solar panel that stores energy throughout the day for automatic nighttime illumination. This environmentally friendly solution eliminates the need for external power sources, making it a convenient and energy-efficient choice for your outdoor décor needs.

## Technical Specifications

### Installation Features

- Solar panel mounting bracket included
