

Solar Powered Sonic Pest Repeller

This solar pest repeller emits sonic pulses into the ground to repel moles, voles, and gophers. Powered by solar energy, the device requires no batteries or wiring and is easy to install.

Product Overview

Effective Solar-Powered Deterrent

The Solar Powered Sonic Pest Repeller is an eco-friendly solution for managing burrowing pests like moles, voles, and gophers. By utilizing solar energy, this device generates consistent sonic pulses and ground vibrations that effectively discourage rodents from inhabiting your lawn or garden. Its robust, weatherproof design ensures long-lasting operation without the need for manual battery replacements or electrical wiring.

Technical Features

Power Source	Solar Energy
Target Pests	Moles, Voles, Gophers
Weather Resistant	Yes

Operational Details

Method of Operation

- Sonic pulses
- Ground vibrations

Installation	Easy installation with no wiring required
