

Solid Conductor Cable

This is a solid conductor cable for electrical applications. It provides a reliable and durable electrical connection.

Product Overview

Solid Conductor Cable Overview

The Solid Conductor Cable is engineered for professional electrical installations where stable performance and high conductivity are required. Designed for durability and efficient energy transmission, this cable provides a reliable solution for various commercial and industrial wiring applications. Its construction ensures excellent structural integrity during installation and long-term operation in demanding environments.

Technical Details

Construction Materials

- Copper Conductor
- PVC Insulation
- Flame Retardant Jacket

Conductor Type	Solid
Certifications	ISO 9001, RoHS, CE

Performance Metrics

Key Electrical Ratings

600 V

Voltage Rating

90 °C

Max Operating Temp
