

Solid Electrical Wire

This is a solid electrical wire for conducting current. It is suitable for use in various electrical applications.

Product Overview

High-Quality Solid Electrical Wire

This solid electrical wire is engineered for reliable performance in diverse industrial and commercial electrical installations. Designed for durability and consistent conductivity, it offers excellent mechanical strength for demanding routing applications. Its solid core construction ensures stability and ease of termination, making it a preferred choice for professional electrical infrastructure projects.

Technical Specifications

Safety Certifications

RoHS Compliant • ISO Certified

Conductor Construction	Solid core
Material Standards	High Conductivity, Corrosion Resistant, Solid Copper

Performance Metrics

Key Electrical Ratings

600 V

Voltage Rating

90 °C

Max Operating Temp
