

Solid State Relay 40A 380VAC

This solid state relay is designed for reliable AC load switching. It features a 40A current rating at up to 380VAC and operates within a 50-60Hz frequency.

Product Overview

L1RRD

Standard industrial Solid State Relay configured for 40A resistive load switching.

Professional Solid State Relay

This high-performance Solid State Relay is designed for reliable and silent switching of AC loads in industrial applications. Supporting a rated load current of 40A at up to 380VAC, it offers exceptional durability for resistive load control. The unit is fully compliant with UL and RoHS safety standards, ensuring environmental responsibility and operational reliability.

Electrical Specifications

Rated Load Current

40 A

Rated Current

Operating Voltage	380 VAC
Input Voltage Range	3-32 VDC
Frequency Range	50-60 Hz

Compliance and Standards

Certifications	UL, RoHS
----------------	----------

Technical Details

Supported Current Ratings

- 10A
- 20A
- 25A
- 30A
- 40A
