Product Overview

Advanced Sonic Oral Care

This smart sonic electric toothbrush utilizes powerful magnetic levitation technology to deliver up to 42,000 strokes per minute, ensuring effective cleaning and whitening. Designed for professional oral hygiene, it features a pressure-sensing function with gradual strength adjustment to protect gums and enamel. The device offers extensive customization with 15 distinct brushing modes and a long-lasting battery that provides up to 60 days of use on a single 8-hour wireless charge.
