Product Overview

Silent Diesel Generator Set

This silent type diesel generator set is engineered for reliable and efficient power generation across industrial, commercial, and residential sectors. Housed within a specialized soundproof canopy, it significantly minimizes noise pollution, making it an ideal solution for noise-sensitive environments. The system features a robust engine and high-performance alternator for stable, consistent output, alongside an integrated control panel for real-time monitoring and safety management.

Key Features

Noise Level

Silent Type • Soundproof Canopy

Safety Systems

- Emergency stop button
- Automatic shutdown system
- Integrated cooling system

Technical Details

Core Components

Component	Function
Diesel Engine	Power generation source
Alternator	High-performance power output
Control Panel	Digital performance monitoring
Fuel System	Designed for continuous operation

Maintenance

Service Design

Optimized for ease of maintenance with accessible service points and durable construction.
