

Soundproof Gas Generator Set for Continuous Power

This gas generator set is designed for continuous power generation. It features a robust enclosure for noise reduction and weather protection, making it suitable for various backup power applications.

ADDITIONAL IMAGES

Overview

Continuous Power Solution

This soundproof gas generator set is engineered for high efficiency, low operating costs, and exceptional reliability. It features a robust, compact design that simplifies installation while ensuring stable performance under 100% load. Designed for versatility, it supports various gas sources and maintains operational integrity in extreme environments ranging from -28.9°C to 50°C.

Performance & Environment

Operating Noise Level

67 dB(A)

Noise Level at 7m

Minimum Operating Temperature	-28.9 °C
Max Ambient Temperature	50 °C
Continuous Run Time at Max Temp	100 hours

Technical Features

Key Features

- Compact and simple installation design
- 100% load tested for reliability
- Integrated critical-grade silencer
- High-performance lubrication oil pump
- Large capacity lubrication oil tank
- High-capacity coolant water tank

Compliance	Low Emission, High Efficiency, Weather Protected
