

Soundproof Power Generator

This soundproof power generator minimizes noise levels, making it suitable for noise-sensitive environments. It provides a stable and reliable power supply for various applications.

Overview

Professional Soundproof Power Generation

This series of industrial-grade power generators is engineered to provide reliable and stable energy solutions for commercial, industrial, and residential environments. Available in three distinct acoustic configurations, the units feature advanced digital voltage regulation and an integrated control system for maximum operational safety. Built for durability and performance, these generators effectively minimize noise pollution while maintaining a consistent power output.

Acoustic Performance

Noise Levels by Model

Type	Noise Level @ 7m
Silent Type	75 dBA
Super Silent Type	60 dBA
Ultra Silent Type	51 dBA

Technical Features

Core Features

- Digital voltage regulator for stable output
- Integrated control panel
- Automatic transfer switch (ATS) for safety
- High-performance soundproofing construction

Certifications

Certifications	CE, ISO 9001
