

SPDT Electromechanical Pressure Switch

Electromechanical pressure switch regulates pressure in industrial applications. It features a Single Pole Double Throw (SPDT) contact for versatile switching.

Product Overview

Industrial Pressure Control

This SPDT electromechanical pressure switch is engineered for reliable pressure monitoring and control in demanding industrial environments. Designed for versatility, it supports integration across various pneumatic and hydraulic systems to ensure precise electrical signaling. Its durable housing and robust internal mechanism provide long-term performance and protection against environmental factors.

Technical Specifications

Certifications

CE

Dimensional Specs

100 mm

Width

104 mm

Height

Contact Configuration

SPDT (Single Pole Double Throw)

Primary Applications

Fire Fighting Units, Hydraulic Systems, Pneumatic Systems, Process Control

Model Identification

PS/12
