

Specialty Paper Production Machine, 3320mm

This 3320mm specialty paper machine is designed for producing high-quality specialty papers. It features a robust construction with advanced process control systems for precise paper formation, drying, and finishing.

Overview

High-Efficiency Specialty Paper Production

This 3320mm specialty paper production machine is engineered for high-precision manufacturing of NCR base paper, CF paper, and pre-coated heat-sensitive facsimile paper. Designed for optimal performance, it features advanced process control systems for consistent paper formation, drying, and finishing. The robust construction and automated monitoring capabilities ensure reliability, while the modular design facilitates easier maintenance and long-term operational efficiency.

Technical Specifications

Daily Capacity

153 t/24h

Capacity

Compatible Paper Grades	NCR base paper, CF paper, Pre-coated heat sensitive Facsimile paper
Basis Weight Range	30-115g/m
Operating Speed	800 m/min

Dimensional Specifications

Trim at Reel	3320 mm
Trim off Winder	3240 mm
