

Speedometer Cable for Vehicle Speed Measurement

This is a replacement speedometer cable designed for specific vehicle models. The cable ensures reliable transmission of rotational data from the vehicle's transmission to the speedometer gauge, providing accurate speed information to the driver.

Product Overview

Precision Speed Measurement

This replacement speedometer cable is engineered to provide reliable and accurate transmission of rotational data from the vehicle's transmission to the speedometer gauge. Featuring a durable outer casing and a precisely manufactured inner cable, it ensures consistent performance and longevity. Designed for seamless integration, the cable includes secure connection points that facilitate straightforward installation for maintenance and repair professionals.

Technical Specifications

Primary Function	Transmission of rotational speed data
Construction	Durable Outer Casing, Precision Engineered Inner Cable

Installation & Compatibility

Application	Vehicle Repair • Speedometer Maintenance
Installation	Secure connection points for easy mounting
