

Split Air Conditioner System

This split air conditioner system provides efficient climate control. It includes an outdoor unit for air circulation and an indoor unit with a digital display.

Product Overview

High-Efficiency Climate Control

This split air conditioner system provides robust heating and cooling capabilities suitable for both residential and commercial applications. The design features a high-performance outdoor unit engineered for optimal air circulation and a versatile indoor unit equipped with a digital interface for precise control. Built with efficiency and reliability in mind, this system ensures consistent environmental comfort in professional or home settings.

Technical Specifications

System Configuration

- Outdoor heat pump unit
- Indoor control unit
- Digital display interface
- Integrated connection ports

Core Functions

Heating, Cooling, Air Circulation

Compliance and Standards

Compliance Markings

Certified Standards • Regulatory Compliant
