

Split Metal Sealed Ball Valve

This split metal sealed ball valve is engineered for robust performance. Compliant with JB/T 1686 face-to-face and JB/T 79.1 flange standards, it ensures precise control.

Product Overview

Professional Grade Split Metal Sealed Ball Valves

These high-performance split metal sealed ball valves are engineered for durability and precise flow control in demanding industrial environments. Built to strict industry standards including JB/T 1686 for face-to-face dimensions and JB/T 79.1 for flange configurations, these units provide reliable integration into existing piping systems. Each valve is designed for longevity and can be customized to specific project requirements, offering a versatile solution for various nominal diameters.

Technical Specifications

Standards Compliance

JB/T 1686 • JB/T 79.1

Nominal Diameter (DN)

15mm, 20mm, 25mm, 32mm, 40mm, 50mm, 65mm, 80mm, 100mm, 125mm, 150mm, 200mm

Dimensional Data

Comprehensive Dimension Chart (mm)

| DN | Bore (d) | Length (L) | Flange (D) |
|-----|----------|------------|------------|
| 15 | 15 | 108 | 95 |
| 20 | 20 | 117 | 105 |
| 25 | 25 | 150 | 115 |
| 32 | 32 | 165 | 135 |
| 40 | 40 | 180 | 145 |
| 50 | 50 | 200 | 160 |
| 65 | 65 | 220 | 180 |
| 80 | 76 | 250 | 195 |
| 100 | 100 | 280 | 215 |
| 125 | 125 | 320 | 245 |
| 150 | 150 | 360 | 280 |
| 200 | 200 | 400 | 335 |
