Product Overview

Ergonomic Tool Management

This spring tool balancer is professionally designed to suspend heavy hand tools, effectively neutralizing their weight for the operator. By providing near-weightless maneuverability, it significantly reduces worker fatigue and enhances productivity on busy assembly lines. The unit operates without power, making it a cost-effective solution for optimizing workspace efficiency and improving safety.

Technical Specifications

Available Models & Capacities

Model	Capacity Range
MCT-602	1.0kg - 2.0kg
MCT-M03	1.0kg - 3.0kg
Standard Series	15.0kg - 22.0kg

Performance Metrics

22 kg

Maximum Load Capacity

Core Features

Adjustable spring tension, Zero gravity suspension, No power required, Durable construction

Applications

Industrial Applications

- Assembly lines
- Manufacturing workstations
- Workshops
- Tool suspension at desired heights
